

The SuperSkiCard – one ticket for a winter full of variety

Unique. Varied.

Up to 23 regions, 87 ski resorts and more than 2,800 kilometres of slopes: The early bird sale for the 2026/27 SuperSkiCard season starts on 28 September 2026. Those who purchase the SuperSkiCard Premium or the 10-day flexible ticket by 3 December 2026 benefit from the early bird price.

One Ticket, countless possibilities

Variety with the SuperSkiCard is guaranteed throughout the 2026/27 season, from the first ski day in autumn to sunny spring skiing. With a total of 205 possible days of use, the SuperSkiCard offers one of the longest seasons in the Alps, from 10 October 2026 to 2 May 2027. A total of 87 ski resorts in Salzburg, Tyrol, Carinthia, Upper Austria, Styria and Bavaria are waiting to be discovered. More than 2,800 kilometres of slopes, over 900 lifts and cable cars, and more than 800 mountain huts offer a wide range of possibilities: from glacier skiing and family-friendly ski days to sporty runs and enjoyable spring skiing in the sunshine.

"The SuperSkiCard offers the flexibility to experience winter in all its variety. One ticket means countless possibilities, and the early bird sale makes the decision particularly worthwhile," explains Dr Erich Egger, Chairman of the SuperSkiCard ski association.
